Microsoft

SC-100

Microsoft Cybersecurity Architect

<https://killexams.com/pass4sure/exam-detail/SC-100>

Question: 33

You are creating an application lifecycle management process based on the Microsoft Security Development Lifecycle (SDL).

You need to recommend a security standard for onboarding applications to Azure. The standard will include recommendations for application design, development, and deployment

What should you include during the application design phase?

- A. static application security testing (SAST) by using SonarQube
- B. dynamic application security testing (DAST) by using Veracode
- C. threat modeling by using the Microsoft Threat Modeling Tool
- D. software decomposition by using Microsoft Visual Studio Enterprise

Answer: C

Explanation:

<https://www.microsoft.com/en-us/securityengineering/sdl/threatmodeling>

Question: 34

HOTSPOT

You need to recommend a strategy for App Service web app connectivity. The solution must meet the landing zone requirements.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

<p>For connectivity from App Service web apps to virtual machines, use:</p>	<div><div></div><div>Private endpoints</div><div>Service endpoints</div><div>Virtual network integration</div></div>
<p>For connectivity from virtual machines to App Service web apps, use:</p>	<div><div></div><div>Private endpoints</div><div>Service endpoints</div><div>Virtual network integration</div></div>

Answer:

For connectivity from App Service web apps to virtual machines, use:

Private endpoints
Service endpoints
Virtual network integration

For connectivity from virtual machines to App Service web apps, use:

Private endpoints
Service endpoints
Virtual network integration

Explanation:

Box 1: Virtual Network Integration – correct

Virtual network integration gives your app access to resources in your virtual network, but it doesn't grant inbound private access to your app from the virtual network.

Box 2: Private Endpoints. – correct

You can use Private Endpoint for your Azure Web App to allow clients located in your private network to securely access the app over Private Link.

Question: 35

Your company is developing a serverless application in Azure that will have the architecture shown in the following exhibit.

You need to recommend a solution to isolate the compute components on an Azure virtual network.

What should you include in the recommendation?

- A. Azure Active Directory (Azure AD) enterprise applications
- B. an Azure App Service Environment (ASE)
- C. Azure service endpoints
- D. an Azure Active Directory (Azure AD) application proxy

Answer: B

Explanation:

App Service environments (ASEs) are appropriate for application workloads that require:

Very high scale, Isolation and secure network access, High memory utilization.

This capability can host your:

Windows web apps, Linux web apps

Docker containers, Mobile apps

Functions

<https://docs.microsoft.com/en-us/azure/app-service/environment/overview>

Question: 36

You need to recommend a solution to scan the application code. The solution must meet the application development requirements.

What should you include in the recommendation?

- A. Azure Key Vault
- B. GitHub Advanced Security
- C. Application Insights in Azure Monitor
- D. Azure DevTest Labs

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/learn/modules/introduction-github-advanced-security/2-what-is-github-advanced-security>

Question: 37

HOTSPOT

You need to recommend a strategy for securing the litware.com forest. The solution must meet the identity requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

For Azure AD-targeted threats:

Azure AD Identity Protection
Azure AD Password Protection
Microsoft Defender for Cloud

For AD DS-targeted threats:

An account lockout policy in AD DS
Microsoft Defender for Endpoint
Microsoft Defender for Identity

Answer:

For Azure AD-targeted threats:

Azure AD Identity Protection
Azure AD Password Protection
Microsoft Defender for Cloud

For AD DS-targeted threats:

An account lockout policy in AD DS
Microsoft Defender for Endpoint
Microsoft Defender for Identity

Explanation:

Question: 38

You are designing a ransomware response plan that follows Microsoft Security Best Practices.

You need to recommend a solution to limit the scope of damage of ransomware attacks without being locked out.

What should you include in the recommendations?

- A. Privileged Access Workstations (PAWs)
- B. emergency access accounts
- C. device compliance policies
- D. Customer Lockbox for Microsoft Azure

Answer: B

Question: 39

HOTSPOT

You need to recommend a multi-tenant and hybrid security solution that meets to the business requirements and the hybrid requirements.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct

selection is worth one point.

Answer Area

To centralize subscription management:

- Azure AD B2B
- Azure AD B2C
- Azure Lighthouse

To enable the management of on-premises resources:

- Azure Arc
- Azure Stack Edge
- Azure Stack Hub

Answer:

Answer Area

To centralize subscription management:

- Azure AD B2B
- Azure AD B2C
- Azure Lighthouse

To enable the management of on-premises resources:

- Azure Arc
- Azure Stack Edge
- Azure Stack Hub

Question: 40

HOTSPOT

You use Azure Pipelines with Azure Repos to implement continuous integration and continuous deployment (CI/CO) workflows.

You need to recommend best practices to secure the stages of the CI/CD workflows based on the Microsoft Cloud Adoption Framework for Azure.

What should you include in the recommendation for each stage? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Git workflow: Azure Key Vault

- Azure Key Vault
- Custom roles for build agents
- Protected branches
- Resource locks in Azure

Secure deployment credentials: Protected branches

- Azure Key Vault
- Custom roles for build agents
- Protected branches
- Resource locks in Azure

Answer:

Answer Area

Git workflow: Azure Key Vault

- Azure Key Vault
- Custom roles for build agents
- Protected branches
- Resource locks in Azure

Secure deployment credentials: Protected branches

- Azure Key Vault
- Custom roles for build agents
- Protected branches
- Resource locks in Azure

Question: 41

A customer is deploying Docker images to 10 Azure Kubernetes Service (AKS) resources across four Azure subscriptions. You are evaluating the security posture of the customer.

You discover that the AKS resources are excluded from the secure score recommendations. You need to produce accurate recommendations and update the secure score.

Which two actions should you recommend in Microsoft Defender for Cloud? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Configure auto provisioning.
- B. Assign regulatory compliance policies.
- C. Review the inventory.
- D. Add a workflow automation.
- E. Enable Defender plans.

Answer: A,E

Explanation:

<https://docs.microsoft.com/en-us/azure/defender-for-cloud/update-regulatory-compliance-packages>

<https://docs.microsoft.com/en-us/azure/defender-for-cloud/workflow-automation>

Question: 42

Your company has a Microsoft 365 E5 subscription.

Users use Microsoft Teams, Exchange Online, SharePoint Online, and OneDrive for sharing and collaborating. The company identifies protected health information (PHI) within stored documents and communications.

What should you recommend using to prevent the PHI from being shared outside the company?

- A. insider risk management policies
- B. data loss prevention (DLP) policies
- C. sensitivity label policies
- D. retention policies

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/create-test-tune-dlp-policy?view=o365-worldwide>

SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
